JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Activated carbon
Thermal stability of oxygenated functions in activated carbons, 125
Almond shells
Evolution of gases from the pyrolysis of modified almond shells: effect of impregnation with $CoCl_2$, 59
Aluminium
The effect of aluminium on the formation of PAH, Methyl-PAH and chlorinated aromatic compounds during thermal decomposition of PVC, 157
Amber samples
Geographical classification of amber based on pyrolysis- and infra-red spectroscopy data, 71
Amine
Pyrolysis-gas chromatography mass spectrometry analysis of starch-based ion-exchangers, 145
Analytical pyrolysis
Characterization of sulfur in wood pulps using pyrolysis-gas chromatography with sulfur-selective detection: Part 1. Fractionated pyrolysis, 1
Anhydrides
Thermal stability of humic substances and their metal forms: an investigation using FTIR emission spectroscopy, 103

Catalytic degradation
Catalytic degradation of polyethylene into fuel oil over mesoporous silica (KFS-16) catalyst, 15
Chlorinated compounds
The effect of aluminium on the formation of PAH, Methyl-PAH and chlorinated aromatic compounds during thermal decomposition of PVC, 157

Decarboxylation
Thermal stability of humic substances and their metal forms: an investigation using FTIR emission spectroscopy, 103
Dehydroabietic acid
Analysis of oxidised diterpenoid acids using thermally assisted methylation with TMAH, 41
Demethylation
Pyrolysis of triphenylphosphineacetylmethylenetrimethyltin chloride, 169
DI-MS
Thermal degradation of *Pinus halepensis* pine-needles using various analytical methods, 115
Diterpenoid acids
Analysis of oxidised diterpenoid acids using thermally assisted methylation with TMAH, 41
DSC
Thermal degradation of *Pinus halepensis* pine-needles using various analytical methods, 115

Electrochemical methods
Electrochemical methods for monitoring the volatile pyrolysis products of *Pinus halepensis* pine-needles, 139

FPD
Characterization of sulfur in wood pulps using pyrolysis-gas chromatography with sulfur-selective detection: Part 1. Fractionated pyrolysis, 1
Fractionated pyrolysis
Characterization of sulfur in wood pulps using pyrolysis-gas chromatography with sulfur-selective detection: Part 1. Fractionated pyrolysis, 1

PII S0165-2370(97)00071-5

FTIR
Thermal stability of oxygenated functions in activated carbons, 125
Fuel oil
Catalytic degradation of polyethylene into fuel oil over mesoporous silica (KFS-16) catalyst, 15

Gas formation
Gas formation in the thermal decomposition of large spherical wood particles, 27

Hierarchical cluster analysis
Geographical classification of amber based on pyrolysis- and infra-red spectroscopy data, 71
Humic substances
Thermal stability of humic substances and their metal forms: an investigation using FTIR emission spectroscopy, 103

Inorganic fraction
Mass spectrometry validation of a kinetic model for the thermal decomposition of tyre wastes, 83
Ion-exchangers
Pyrolysis-gas chromatography mass spectrometry analysis of starch-based ion-exchangers, 145

Kinetic model
Mass spectrometry validation of a kinetic model for the thermal decomposition of tyre wastes, 83
Kraft cooking
Characterization of sulfur in wood pulps using pyrolysis-gas chromatography with sulfur-selective detection: Part 1. Fractionated pyrolysis, 1

Large particles
Gas formation in the thermal decomposition of large spherical wood particles, 27
Lignocellulosic materials
Gas formation in the thermal decomposition of large spherical wood particles, 27

Mass spectrometry
Evolution of gases from the pyrolysis of modified almond shells: effect of impregnation with $CoCl_2$, 59
Mesoporous silica
Catalytic degradation of polyethylene into fuel oil over mesoporous silica (KFS-16) catalyst, 15

Nitric acid oxidation
Thermal stability of oxygenated functions in activated carbons, 125

Organic fraction
Mass spectrometry validation of a kinetic model for the thermal decomposition of tyre wastes, 83

PAH
The effect of aluminium on the formation of PAH, Methyl-PAH and chlorinated aromatic compounds during thermal decomposition of PVC, 157
Pinus halepensis pine-needles
Electrochemical methods for monitoring the volatile pyrolysis products of *Pinus halepensis* pine-needles, 139
Thermal degradation of *Pinus halepensis* pine-needles using various analytical methods, 115
Polyethylene
Catalytic degradation of polyethylene into fuel oil over mesoporous silica (KFS-16) catalyst, 15
Principal component analysis
Geographical classification of amber based on pyrolysis- and infra-red spectroscopy data, 71
PVC
The effect of aluminium on the formation of PAH, Methyl-PAH and chlorinated aromatic compounds during thermal decomposition of PVC, 157
Py-GC-FID
Thermal degradation of *Pinus halepensis* pine-needles using various analytical methods, 115
Py-GC-MSD
Thermal degradation of *Pinus halepensis* pine-needles using various analytical methods, 115
Pyrolysis
Electrochemical methods for monitoring the volatile pyrolysis products of *Pinus halepensis* pine-needles, 139
Evolution of gases from the pyrolysis of modified almond shells: effect of impregnation with $CoCl_2$, 59
Pyrolysis of triphenylphosphineacetylmethylenetrimethyltin chloride, 169

Thermally assisted methylation
Analysis of oxidised diterpenoid acids using thermally assisted methylation with TMAH, 41
Thermal treatment
Thermal stability of oxygenated functions in activated carbons, 125
Thermogravimetry
Evolution of gases from the pyrolysis of modified almond shells: effect of impregnation with $CoCl_2$, 59
TPD
Thermal stability of oxygenated functions in activated carbons, 125
Trimethyltin chloride
Pyrolysis of triphenylphosphineacetylmethylenetrimethyltin chloride, 169
Tyre waste
Mass spectrometry validation of a kinetic model for the thermal decomposition of tyre wastes, 83
XPS
Thermal stability of oxygenated functions in activated carbons, 125
Ylids
